

## City of Eugene - Wastewater Division Environmental Management System

### 2006 Objectives and Targets

Objective	Target
<b>Natural Resources Reduction</b>  <b>Program Coordinator:</b> Larry Pedersen	Maximize the beneficial reuse of methane produced as a result of Biosolids digestion.
	Increase the amount of non-petroleum based fuels used by the Division's Fleet by 10% (2005 Baseline).
	Decrease the total fuel consumed by the Division's fleet equipment.
<b>Water Quality/ Effluent Quality Improvements</b>  <b>Program Coordinator:</b> Bill Bennett	Achieve a 5% decrease in the monthly average for Effluent Total Suspended Solids and Turbidity from May through October.
	Establish a baseline for Effluent Color and evaluate its environmental impact.
<b>Air Emissions / Odor Reduction</b>  <b>Program Coordinator:</b> Dave Breitenstein	Reduce odors emanating from the regional wastewater facilities.
	Reduce or offset the emission of green house gases generated by wastewater treatment functions.
	Reduce Carbon Monoxide emissions (lbs) from the engine generator by 50%.
